jasonchen.website | linkedin.com/in/yu-chien-chen-99a013329 | github.com/misterion0206

Full-stack software engineer with 3+ years of experience delivering enterprise and cloud applications with C#, ASP.NET Core, Angular/React, SQL Server, and Azure. Led a five-person engineering team, deployed ERP/APS solutions for enterprise clients, and built production-ready web applications with CI/CD and end-to-end testing.

PROFESSIONAL EXPERIENCE

Chenglin Innovation Co., Ltd., Taipei, Taiwan

Nov 2022 - Aug 2024

Software Development Engineer

- Led a five-person engineering team to deliver a procurement notification platform for Taipei 101 in two months using ASP.NET Core MVC and SQL Server, giving users and managers instant status updates through a shared message board and improving cross-team communication efficiency by 30%.
- Developed tender and bidding workflows, role-based menu access, and API integrations with the client's internal systems.
- Modernized an ERP application using Angular, ASP.NET Core, and SQL Server, adding multilingual support and reducing page-load time by 25%.
- Built a corporate information portal using ASP.NET Core and SQL Server that gave leadership a single, real-time view of project status, cost, and revenue across the organization.
- Introduced Azure DevOps CI/CD pipelines, reducing release-cycle time by 40%.

Digihua Intelligent Systems Co., Ltd., Taichung, Taiwan

Dec 2020 - Mar 2022

Technical R&D Engineer

- Built multilingual import/export modules using C#, WinForms, and SQL, supporting 5+ languages and improving operational efficiency by 40%.
- Delivered 10+ customized workflow, validation, reporting, and import features using DevExpress and NPOI.
- Deployed APS solutions for 5+ enterprise clients and supported customized requirements and integrations for 15+ clients.
- Collaborated with a cross-regional team of 10+ members and presented technical solutions to executive stakeholders.

PROJECTS

Product Creation & E-Commerce Platform

2026 - Present

- Built Next.js/React storefront and administration applications on an ASP.NET Core Web API with Entity Framework Core, Azure SQL, and Azure Blob Storage.
- Implemented a Konva/react-konva customization studio with saved designs, cart, Stripe checkout, and order workflows, secured by JWT authentication with refresh tokens and role-based authorization.
- Automated delivery with GitHub Actions CI/CD and Playwright end-to-end tests, deploying through staging and production controls to Azure App Service and Vercel.
- Case Study: jasonchen.website/projects/ecommerce-platform

AI-Powered Portfolio

2026

- Built and deployed a multilingual portfolio using Next.js, React, TypeScript, and Tailwind CSS with English, Traditional Chinese, and Spanish support.
- Integrated the Google Gemini API with function calling and typed portfolio data so visitors can explore experience, projects, resume links, and page sections.
- Protected the public chat endpoint with same-origin validation and Upstash Redis sliding-window rate limiting.
- GitHub: github.com/misterion0206

EDUCATION

Stevens Institute of Technology, Hoboken, NJ - M.S. in Computer Science

May 2026

National Chung Cheng University, Chiayi, Taiwan - B.S. in Mathematics (Natural Sciences)

May 2019

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, Java

Backend: .NET, ASP.NET Core, Entity Framework Core, REST APIs, JWT, Swagger/OpenAPI, SignalR

Frontend: React, Next.js, Angular, Tailwind CSS, Konva/react-konva

Cloud & DevOps: Azure App Service, Azure SQL, Azure Blob Storage, Azure DevOps, GitHub Actions, Vercel, CI/CD

Databases: SQL Server, Redis

Testing & Tools: Git, GitHub, Playwright, xUnit, DevExpress, NPOI

Integrations: Stripe, Google Gemini API, Function Calling
