Full-stack .NET engineer with 3+ years of experience building ERP features, production scheduling (APS) software, and internal web systems in C#, ASP.NET Core, Angular, and SQL Server. Led a five-person team on Taipei 101's procurement portal and rolled out APS software for 5+ clients. Recently built an e-commerce platform with Next.js, ASP.NET Core, and Azure, tested with Playwright and deployed through CI/CD.

PROFESSIONAL EXPERIENCE

Chenglin Innovation Co., Ltd., Taipei, Taiwan — Nov 2022 - Aug 2024
Software Development Engineer

- Led a five-person team that built the notification system and message board for Taipei 101's procurement portal in two months using ASP.NET Core MVC and SQL Server, letting suppliers message Taipei 101's managers in the system.
- Developed tender and bidding workflows, role-based menu access, and API integrations with the client's internal systems.
- Added multilingual support to a client's Angular/ASP.NET Core ERP system and improved its page load times.
- Built a portal in ASP.NET Core and SQL Server in three months to track project progress, income, and costs.
- Introduced CI/CD pipelines in Azure DevOps to automate the team's builds and deployments.

Digihua Intelligent Systems Co., Ltd., Taichung, Taiwan — Dec 2020 - Mar 2022
R&D Engineer

- Built multilingual import/export modules in C#, WinForms, and SQL so the ERP product could display data in 5+ languages, including Chinese, English, and Vietnamese.
- Developed 10+ custom features for the APS product, including field formatting, report syntax checks, and data import settings, using DevExpress and NPOI.
- Rolled out the APS system for 5+ clients and handled customization and data integration requests from 15+ clients.
- Worked with 10+ colleagues across regions and demoed new features to executives.

PROJECTS

Product Creation & E-Commerce Platform — 2026 - Present

- Built Next.js/React storefront and administration applications on an ASP.NET Core Web API with Entity Framework Core, Azure SQL, and Azure Blob Storage.
- Implemented a Konva/react-konva customization studio with saved designs, cart, Stripe checkout, and order workflows, secured by JWT authentication with refresh tokens and role-based authorization.
- Automated delivery with GitHub Actions CI/CD and Playwright end-to-end tests, deploying through staging and production controls to Azure App Service and Vercel.
- Case Study: jasonchen.website/projects/ecommerce-platform

AI-Powered Portfolio — 2026

- Built and deployed a multilingual portfolio using Next.js, React, TypeScript, and Tailwind CSS with English, Traditional Chinese, and Spanish support.
- Integrated the Google Gemini API with function calling and typed portfolio data so visitors can explore experience, projects, resume links, and page sections.
- Protected the public chat endpoint with same-origin validation and Upstash Redis sliding-window rate limiting.
- GitHub: github.com/misterion0206

EDUCATION

Stevens Institute of Technology, Hoboken, NJ - M.S. in Computer Science — May 2026

National Chung Cheng University, Chiayi, Taiwan - B.S. in Mathematics (Natural Sciences) — May 2019

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, Java
Backend: .NET, ASP.NET Core, Entity Framework Core, REST APIs, JWT, Swagger/OpenAPI, SignalR
Frontend: React, Next.js, Angular, Tailwind CSS, Konva/react-konva
Cloud & DevOps: Azure App Service, Azure SQL, Azure Blob Storage, Azure DevOps, GitHub Actions, Vercel, CI/CD
Databases: SQL Server, Redis
Testing & Tools: Git, GitHub, Playwright, xUnit, DevExpress, NPOI
Integrations: Stripe, Google Gemini API, Function Calling
